Value of new buildings soars past \$9 million

The comprehensive 1975 construction report issued recently by building inspector Vern Schoen indicates that 369 permits were issued during 1975 for a total value of \$9,047,947.

Of that number, 170 were new homes, which Mayor Don Storey said is a larger figure than that of new homes constructed at Nampa in 1975.

The mayor added that "We have more than 500 lots approved for building that haven't been built on yet."

Schoen's comment at Monday's city council meeting was, "The building department definitely is running to where it's a paying proposition."

Mobile homes rise

His report also shows a breakdown of the permits issued, 77 of which were for mobile homes, bringing the city's total to 523. There were 59 remodeled homes for which permits were needed, and 44 commercial constructions, the latter valued at an aggregate of more than \$4 million.

New apartment buildings totaled 12, with 38 units altogether, bringing the overall estimate to 346 apartments.

Last year was highest

Five-year figures show that Meridian permits rose from 233 in 1971 to 362 in 1973, then dipped to 258 the next year before jumping to 369 for 1975. However, 1973 was the only year the value of the constructions went past the \$4 million mark, with a total of almost \$7 million that year.

The biggest boom in new housing

prior to 1975 also came in 1973, when 96 permits were issued. The estimated value of the 170 housing permits for 1975 is about \$3.8 million.

Only two removals were reported for 1975, at a total cost of \$7,500, the first elimination of housing in the five-year span.

Plans for Meridian

More programs, patrons stamp library's future

More books, longer hours, growing patronage and new community programs all are part of Meridian public library's current operation facelift, under the direction of librarian Grove Koger.

Several weeks ago, the library almost tripled the hours it is open to accommodate an ever-rising number of users. At the same time a children's story hour was instigated, and more plans are in the offing.

The library's hours, now from 10 a.m. to 9 p.m. Monday and Friday, and from 10 a.m. to 6 p.m. Tuesday, Wednesday, Thursday, and Saturday, are an important step toward accommodating upcoming programs.

First among them is a books-for-shut-ins program, which Koger says "We're just beginning work on now," and which should be operable within two months. The initial step will be a campaign to determine who would benefit from the program.

Next, volunteers will be assigned to disabled and elderly individuals. Their particular reading tastes will be examined and appropriate books chosen and delivered to them. Koger plans to pattern it after a successful Boise program, and admits "I try to utilize everybody else's experience whenever I can."

Clubs planned

"We're also thinking about reading clubs for older children, but that's a little vague right now." Such a project would be largely recreational and would include field trips and group discussions. Koger expressed pleasure with the amount of volunteer help he has received, "And now I'm glad to have something for them to do."

Even an adult reading group is in the tentative plans, although no program has been outlined yet. When it is developed, it will be

intended to introduce readers to books they might not otherwise discover. Koger hopes to avoid the Great Books format many libraries use, and instead concentrate on slightly less "heavy" reading.

Book count rises

The library's volume count continues to rise, and Koger said the 1976 book budget is higher than last year's, when more than 1,000 new titles were purchased. Exact figures are not yet available, since the library district's board of trustees has not yet approved a final budget.

That board, chaired by Dave McFaddan, includes Jack Riddlemoser, June Black, Evelyn Olsen and Charline Denny. It has open meetings the fourth Thursday of each month at 8 p.m. in the library.

The trustees are elected for staggered five-year terms, so that normally one member per year is up for reelection.

Some of the major allocations in the estimated \$50,000 budget (which will be comprised of property and sales taxes, grants from the Regional Library System in the form of matching funds, and Comprehensive Employment and Training Act monies), will be in the area of equipment as well as books.

New shelves

A two to three year process of replacing the old wooden bookshelves with more durable, useful and aesthetically pleasing metal structures featuring adjustable shelves, will be started this year.

Perhaps more interesting to patrons, though, will be two more new offerings—an album collection and art prints—both of which will be available on free loan. About \$400 has been allocated for the records, which should enable Koger to select about 100 albums for the first year.

He plans to pick "as wide a range as is possible," which will include spoken-word albums (poetry and drama), children's records, classical and popular music. They probably will be available on a

two-week check out basis.

Borrow a print

The art prints will range in subjects from Audubon bird pictures to the works of famous Impressionists to those of contemporary "masters." They will be mounted on a stiff backing, probably about 19 x 23 inches, and will be covered with a tough, clear plastic.

Koger expects to obtain about 20 for the first year, and they probably will be available on a one-month loan basis.

Yet another service offered by the library includes "talking books," designed particularly for those with poor eyesight but which may be used by anyone. "They're special records which hold a great deal of information, much more than a normal album," Koger explained, "and they require a special record-player; but both are supplied free of charge."

"It's all part of a general trend of more service to the public," he said of the varied plans, "and we're collecting books at a faster rate even than last year. The emphasis in book selection is on useability and practicality, with particular emphasis on strengthening our literature and history and social science."

How-to books

Obtaining more manuals, guides and other books dealing with pragmatic subjects is a foremost objective, followed by additions to the children's and the popular adult fiction sections.

Anything the library does not have is readily obtainable from the state library, one of Idaho's three major universities, or if those sources fail, from as far away as the Northwest Regional Center at the University of Washington, Seattle.

Occasionally, an unusual request may take as long as a month to fill, but even when Koger has to go out of state, the postage the patron must pay is minimal. Anything he can get within Idaho is free of charge.

Periodicals at the library number about a dozen titles, all chosen with the dual guidelines of practicality and variety in mind. Thus, the National Review is the offering on the political right and Ramparts on the left. News, sports, a women's magazine, and gardening are some of the topics covered by the other periodicals.

New hours

Two conditions expected to remain stable in the foreseeable future at the library are the hours, recently expanded to 54 a week, and the space itself, which Koger is intent on utilizing to its utmost.

As the library expands, it's Koger's job to see that the growth is well-directed. He stresses, though, that "I'm always really glad to have any suggestions from the public as to what we should buy."

He wants the quality of his selections to be good, but he also wants the new material to be, as nearly as is possible, the people's choice.
